

vestige

CLEAR THX

Vestige Clear THX is a transparent and thixotropic lab addition silicone used for composite injection moulding.

Description / Use

Transparent and thixotropic Vinylpolysiloxane. It is suitable for counter mould in composite moulding techniques with a transparent flask. Especially suitable for extensive works.

Standard packaging REF 1L5100

VESTIGE CLEAR THX: 2x50ml cartridges + 6 mixing tips

Standard packaging REF 1L5101

VESTIGE CLEAR THX: 4x50ml cartridges

Characteristics

Thixotropic
Transparent

Rigid after setting
Dimensional stability

Practical

Easy to mix

Advantages

It is flowing without dripping
It doesn't interfere with the resin polymerization and reduces its inhibited layer

It doesn't deform
Accurate and unaltered impressions

Specific for extensive and complex works

Packaged in standard 50ml cartridges

TECHNICAL DATA	VESTIGE CLEAR THX
Mixing ratio	1:1
Mixing time (23°C)	Automix
Total working time (23°C)	1'
Setting time (23°C)	12'
Hardness	74 Shore "A"
Linear dimensional change	< 0,20%
Elastic recovery	>99,5%
